ARYA UPRALE
APPLICATION SUPPORT SPECIALIST | ORACLE FUSION & OIC | ENTERPRISE APPLICATIONS
Houston, Texas • 713-857-6453 • upralearya@gmail.com

PROFESSIONAL SUMMARY

Recent Information Technology graduate (4.0 GPA, Summa Cum Laude) with hands-on experience developing, configuring, testing, and troubleshooting enterprise applications and integrations. Experience includes Oracle Fusion HCM, Oracle Integration Cloud (OIC), REST and SOAP services, JSON, SQL, BI Publisher, full-stack web development, and application support. Skilled in translating business needs into technical solutions, validating system changes, resolving integration and configuration issues, and documenting custom processes for users and technical teams.

TECHNICAL SKILLS

Enterprise Applications: Oracle Fusion HCM • Oracle Integration Cloud (OIC) • Functional Setup Manager (FSM) • HCM Data Loader (HDL) • OTBI • BI Publisher
Integration & Automation: REST APIs • SOAP/WSDL • JSON • App-Driven Orchestration • Scheduled Integrations • SFTP/File Transfer • Data Mapping • Lookup Tables • Tracking Fields • Fault Handling
Development & Data: Python • Flask • HTML/CSS • JavaScript • SQL • SQLite • Git • GitHub • Oracle HCM effective-dated data concepts
Application Systems: Windows OS • Application Troubleshooting • Functional Testing • UAT • Change Validation • Requirements Analysis • Configuration Documentation
Business & Support: Technical Documentation • Process Flows • User Guides • Knowledge Articles • Stakeholder Communication • Cross-functional Collaboration

SELECTED TECHNICAL PROJECTS

Oracle Integration Cloud (OIC) — Employee Transfer REST Integration 2026
Hands-on integration project
- Built an app-driven OIC integration that receives employee transfer requests through a REST endpoint and processes JSON payloads from Postman.
- Implemented conditional routing for local versus global transfer scenarios, mapped assignment data, configured business identifiers/tracking, and validated branch behavior during testing.
- Troubleshot payload, variable, mapping, and configuration issues using OIC design-time validation and runtime monitoring.

Oracle HCM Employee Onboarding — Configuration & Functional Testing 2026
Personal project
- Configured a mock Oracle Fusion HCM environment covering workforce structures, job assignments, approval workflows, lifecycle events, security roles/data roles, and flexfields.
- Performed end-to-end functional testing and analyzed configuration dependencies across FSM, KFF/DFF, security, and assignment data to identify and resolve setup issues.
- Documented configuration steps, process flows, and test scenarios to support repeatable system changes and knowledge transfer.

Oracle HCM BI Publisher — Legal Employer Reporting 2026
Hands-on reporting project
- Built and tested a BI Publisher data model/report to retrieve employee legal-employer information by person number using Oracle HCM tables and SQL joins.
- Worked with effective-dated HCM data, organization classifications, assignments, and person records; validated query output using test employee data.

Oracle Integration Cloud — SOAP Service Integration 2026
Hands-on integration lab
- Configured and tested a WSDL-based SOAP service in OIC, mapped request data to a response, activated the integration, and validated the generated endpoint.
- Worked through connection, endpoint, authorization, and activation issues while testing the service with Basic authentication.

ProTrade — Full-Stack Web Application (Capstone) 2026
Arizona State University
- Led development and support of a Flask/SQLite trading application with authentication, portfolio management, transactions, and administrative workflows.
- Investigated and resolved defects involving authentication, routing, database transactions, and application state; validated fixes through functional testing.
- Gathered requirements, translated business needs into features and workflow documentation, and used Git/GitHub for version control, issue tracking, and change management.

LEADERSHIP & TECHNICAL SUPPORT EXPERIENCE

Project Lead — Web Platform Support & Development 01/2026–Present
The Coding Clubhouse | Katy, TX
- Troubleshoot HTML, CSS, JavaScript, and web application issues while providing responsive technical guidance to users with varying technical backgrounds.
- Gather stakeholder requirements, translate user needs into functional features, coordinate issue resolution across team members, and communicate status clearly.
- Create technical documentation, user guidance, and reusable knowledge articles while managing multiple concurrent support and development requests.

Web Development Tutor 08/2025–09/2025
The Coding Clubhouse | Katy, TX
- Supported users with debugging, testing, and validation of web projects; explained technical concepts and troubleshooting steps in clear, actionable terms.
- Documented recurring issues and solutions to create reusable reference material and improve future support efficiency.

EDUCATION

Bachelor of Science in Information Technology 2026
Arizona State University
GPA: 4.0 • Summa Cum Laude • Dean's List (2 semesters)
Relevant Coursework: TCP/IP Networking • Information Systems Security • Applied Programming Languages • Database Systems • User Experience Design • Accessibility & Inclusive Technology • IT Capstone
